Problem Statement

As per the directions of the Prime Minister's Office all Provincial Home Departments were directed to develop an online system for prisoners to apply for mercy petitions online.

An online system was needed to **reduce the unnecessary prolonged delay** in the processing of mercy petitions applications routing from Prisons, Home Department and at the last to Ministry of Interior.

An online system was also needed facilitate sharing of information regarding mercy petitions of prisoners amongst all stakeholders as required by Ministry of Interior.

Stakeholders for the system

The Mercy Petition System is needed to improve coordination between the following departments:

- Inspectorate General Prisons KP
- Home Department
- Interior Ministry
- Human Rights Department

Moreover the system will include different modules for different user roles within these departments. Each user role will have a set of privileges that will improve the communication between the departments and file tracking will be made easier.

PROPOSED SOLUTION

It was decided to develop an Online Mercy Petition System for condemned prisoners to file their mercy appeal petition from their concerned jails through an online portal.

The system has different user roles for each concerned department. Every user role will also be able to include their own remarks before forwarding a petitions and if there are any problem in petition the file will be sent back to the previous department.

The Online Mercy Petition System has the following features:

- Easy tracking of petition status
- Every department will be able to generate the report of petitions
- Better communication between the departments
